Attorney Docket No.: Q95836

AMENDMENT UNDER 37 C.F.R. § 1.111

Application No.: 10/586,858

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A <u>pressure sensitive adhesive product obtained by curing a</u> pressure sensitive adhesive composition

which comprises the following components (A), (B) and (C):

- (A) A hydrolyzable silyl group-containing organic polymer containing at least 1.3 hydrolyzable silyl groups per molecule and having a number average molecular weight of 15,000 to 100,000;
- (B) A hydrolyzable silyl group-containing organic polymer containing 0.3 to 1.3 hydrolyzable silyl groups per molecule and having a number average molecular weight of 500 to 15,000, the main chain of which polymer being substantially composed of a repeating unit or units represented by the general formula -R¹-O- (R¹ being a divalent alkylene group);
 - (C) A tackifier resin.
- 2. (currently amended): The pressure sensitive adhesive composition product according to Claim 1

wherein the main chain of the organic polymer (A) is substantially composed of a repeating unit or units represented by the general formula $-R^1$ -O- (R^1 being a divalent alkylene group).

AMENDMENT UNDER 37 C.F.R. § 1.111

Application No.: 10/586,858

Attorney Docket No.: Q95836

3. (currently amended): The pressure sensitive adhesive eomposition product according to Claim 1

wherein the main chain of the hydrolyzable silyl group-containing organic polymers (A) and (B) is substantially polyoxypropylene.

4. (currently amended): The pressure sensitive adhesive composition product according to Claim 1

wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic polymers (A) and (B) is represented by the following general formula (I):

$$-SiX_aR^2_{3-a} (I)$$

(wherein, R² represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

5. (currently amended): The pressure sensitive adhesive composition product according to Claim 2

wherein the main chain of the hydrolyzable silyl group-containing organic polymers (A) and (B) is substantially polyoxypropylene.

6. (currently amended): The pressure sensitive adhesive composition product according to Claim 2

wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic polymers (A) and (B) is represented by the following general formula (I):

$$-SiX_aR^2_{3-a} \qquad (I)$$

Attorney Docket No.: Q95836

AMENDMENT UNDER 37 C.F.R. § 1.111

Application No.: 10/586,858

(wherein, R² represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

7. (currently amended): The pressure sensitive adhesive eomposition <u>product</u> according to Claim 3

wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic polymers (A) and (B) is represented by the following general formula (I):

$$-SiX_aR^2_{3-a} (I)$$

(wherein, R² represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)
